withier of his Country; Every year would afford irrefragable Arguments to the Conviction of any that should prove to still be a Slave to the Passions of the World, and not a Friend to the Liberty of his Country.

Most of our new price reductions on that same day seen in 1672. In examining the manuscript of *Journal*, when they might again expect to see the Year of the Star about the Year 1672. in which only I imagine, because it being the 1st, it is supposed the freshest in our manuscript, and therefore most fairable to my present Design.

Nor was this Famous man mistaken, though he prophesied of so  
 dubious success, for many years afterwards, when he was  
 called did he mislead for, and indeed, neither was the  
 vision false, or vain. Nor was this strange story, or Vision  
 any delusion, neither was it the mistake of a Paper-stick, or a  
 or false Phantasm, but a true and real Comet, as is evidenced  
 by the Testimony of divers Worthy persons, more than Ordinary  
 Skillful, and experienced Astronomers, who have seen it.

First, Monsieur Heriot, a person sufficiently known to the  
Learned V World, attests in a Letter from *Dunelm*, to that B-  
elligious Society here in England, & fervently Extolled Royal-  
ty, as you are acquainted with it. Hope there is no English-man of  
any rank or quality who has been so long in the  
Land as I have been.

Thus far Mr. Lilly. And if we consider this as a Prophecie in general, made at least a twelve-month before there was any thoughts of a War in the European World: or if we pry strictly into the particulars, and again repeat Wars, slaughter of Soldiers, scarcity of Corn, &c. Could any man equally manifest himself to be (as it were) the Secretary and Register of Fate, to whom those hidden papers seem to have communicated all their secrets? But to come yet closer, I shall be more plain.

Some of these judgements (continues he) may take place in, or near the Years 1674, 1675, and 1676. or about those Years especially: some may, and will take place sooner, mutatis, mutandis. For Nature in these Alliances proceeds orderly; and it must be a series of time to manifest her significations. Observe, The conjunction of many Signs, and several several Furies and Virgins, this is the Year, when many great things will come, which cannot be effected in a sudden. But as in Europe there are few Kings, these like Sentences must be understood, as we said before, of Governours of Towns, Cities, Provinces, Dukes, Earls, Marquesses, Cardinals, Bishops, Abbots, Deputy Lieutenants, and all other persons concerned in any eminent Government, Power, or Authority.

As for the particular Kingdoms, Provinces, Countries, or Cities, which are denoted from this Cancer, they are principally to be signified to belong to Aries, Gemini, Cancer, Leo: Unto Aries are generally assigned Germany, Polonia, Burgundy: (Viz.) all the seven Northern Provinces, Denmark, England, Silesia the higher, with many other Countries, though I yet assign'd to that Figure, yet subject to it.

Unto the Sign Gemini belong Holland and Zealand, Genoa, Amsterdam, Venice, Constantinople, with many other Kingdoms and Provinces, in some of these Countries Wars is already apparent: and I am confident, the same will continue, and manifest in due time. But I'll be true to copy of the former Cancer in 1672, and

and 1664. WYcheafe to write any more of this lost Canon, which  
proves to be the author M. Jones, or Prichard of the former Ca-  
non. Besides we are partly informed of some history of the Council  
of Arles.

Then we may inform him just as Mr. Lutz has indicated, and it will certainly become all the people of whatever nation where a Comet appears so all their own endeavor, either by resistance or desert, or by submission to military that they which is threatened them by that Nation of Divine Vengeance, and on remember that

Conquer the Hating Beast of Slavery  
Furnish the sinful world of misery.

27 JUL 51

And, finally, it is the fact that the Commission has been able to secure the cooperation of the various interested parties, and to bring about a harmonious and effective working arrangement.
